ARE HEADACHES HOLDING YOU BACK?

Have you had a **head injury** and experienced **headaches ever since**? If so, you might have **post-traumatic headache (PTH)**.

A **new MTBI² study** is assessing the efficacy of a **cognitive-behavioral therapy (CBT)** program for smartphone or other internet-connected device designed specifically for service members and veterans who have a **history of head injuries** and are currently experiencing symptoms of **PTH**.

Interested? Scan the QR code to contact us!

INTERESTED?

YOU MAY BE ELIGIBLE IF YOU:

- HAD A HEAD INJURY
- ARE A SERVICE MEMBER, VETERAN OR CIVILIAN
- ARE BETWEEN 18 - 70 YEARS OF AGE
- HAVE RELIABLE ACCESS TO A SMART PHONE OR OTHER DEVICE WITH INTERNET CONNECTING CAPABILITIES
